DIARY NOTES

ADD/A (Colonel White)

23 April 1952

- 25X1A 1. I discussed with [REDACTED] the problem of what to do with the old OSS records in our archives. John thinks that part of them should be thrown away, another part should be microfilmed, and the remainder integrated into the OSO Registry. I authorized him to discuss this matter with [REDACTED] and others, if necessary, and to proceed with such reorganization of these records if all concerned were in agreement. This would not only improve our Records Management Program but would free some space which these records now take up. 25X1A
2. George Meloon telephoned regarding dismissal of [REDACTED] I told him that unless it was clear that by allowing [REDACTED] to resign we would definitely avoid further waste of time, effort, etc., I was opposed to changing our stand at this time. I did authorize Mr. Meloon to have a talk with [REDACTED] find out exactly what his angle is, and told him not to make any final commitment without my permission. 25X1A
- 25X1A 3. [REDACTED] reported for temporary duty and has started to work on our transportation study. H 25X1A
4. I had a twenty-minute talk with [REDACTED] who has agreed to assist [REDACTED] to some extent. I hope that [REDACTED] can get some facts together within the next few days which we can mail [REDACTED] and discuss with him when he is down again in the next two weeks. 25X1A
- 25X1A 5. Talked to [REDACTED] about two staff studies; one, calling inactive reserve personnel to active duty (to include the reimbursement angle), and the other, the release from active duty of service personnel who desire to join CIA as civilians. 25X1A
- 25X1A 6. Talked to [REDACTED] about the procurement of arms and ammunition which has been reported separately to Mr. Wolf. 25X1A
- 25X1A 7. Also talked to [REDACTED] report on the supply and property situation in the Far East. He has given me Procurement's recommendations as to remedial action to be taken, and I will have something concrete to propose on this within a few days. 25X1A
